

## **St. F.X. University - The N64 CANtroller “Getting a Handle on Hunger...or Three”**

Just as the N64 console brought people together for games of Mario Kart, Mario Party, Goldeneye, and more, we aim to bring people of Nova Scotia closer together with our nutritious creation, the N64 CANtroller. While it may be hefty and oddly shaped, it is nonetheless meticulously balanced, both structurally and nutritionally. The Nintendo 64 is an iconic video game console, sporting a controller with an unconventional 3-grip design. With that many grips, we hope that our CANtroller will help us get a firm handle on hunger in the communities of Nova Scotia.

Team: Erik Danecker (Captain)  
Brady Jacobs  
James Kendall  
Keith Leadbeater  
Eleanor McSporran

Thanks to our other team members: Amy Czuczman, Ashley Meachern, Brayden Hoste Poirier, Breton Potter, Brett Layton, Brian MacGillivray, Cecil Ash, Connor McClelland, Jamie Ash, Jayde Olscamp, Patrick Hogan and Logan Doucette.

Special thanks to: Engineers Nova Scotia and St. F.X. for their sponsorship.
